

Monthly Observation Challenges

April 2018

By nightrabbitastro@gmail.com

Unaided Eye

- Venus "rising" through the month
- Mars-Saturn-Moon Conjunction
- M44
- Melotte 111
- Ursa Major (*Challenge: not just the "Big Dipper" – identify ALL the stars.*)
- Cancer → head of Hydra → Hydra → Corvus
- Leo: Light pollution project - globeatnight.org

Binoculars / Small Telescopes

- Mars-Saturn-M22 Conjunction
- M44 and M67
- M53 (*Challenge: can you find another GC in the same field?!*)
- M3
- M81 and M82
- The Messier Galaxies in Leo and Virgo
- Next meeting May 7...bring your "homework!" ☺

Notes and Sketches
